F/J Cooperation Opportunities in H2020 2016-2017

General principles for participation in H2020 collaborative research & innovation projects

➢ Must be carried out by consortia of organisations working together on specific research & innovation areas. A consortium must include at least 3 participants from 3 different EU Member States or Associated countries. In addition to these three partners, any legal entity from anywhere in the world can be included in the consortium.

➢ Researchers throughout the world can participate in Horizon 2020 projects - though they are not always eligible for H2020 funding. In exceptional circumstances, industrialised and emerging economies can receive EU funding if:

  ✓ there is a bilateral agreement between that country and the EU. For instance, researchers in the United States are eligible for EU funding when participating in the health programme on the basis of a reciprocal EU - US/NIH arrangement
  ✓ the country is explicitly identified in the relevant work programme and call for proposal as being eligible for funding
  ✓ their participation is deemed by the European Commission to be essential for carrying out the action.
