Cybersecurity France-Japan: Website

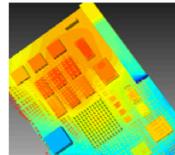

- Collaboration showcase

Joint collaboration between France and Japan on Cybersecurity Research

Following the true success and interest issued from the workshop held in Tokyo April 1-3, 2015, this web site wants to help exchanges between French and Japanese researchers working on cybersecurity. It is expected to get a real impact on research in cybersecurity through a dedicated French-Japan cooperation, taking advantage of: each country specificities and excellence in the domain and a shared vision of geo-strategy and privacy concerns.

LOGIS Logical and Formal Methods for Information Security

About the project

Numerous attacks have been found on cryptographic protocols that were long thought to be secure. Formal logic-based approaches to verify protocol security have helped to find such attacks; however, these approaches have limited applicability, in particular with respect to more powerful attackers as those modeled by computational complexity or those capable of detecting side channel leakage.

To solve this, our project aims at integrating the logical / formal approaches with (A) *complexity theory* and (B) *information theory*. The first direction aims at establishing the foundations of logical verification for security in the computational sense, with the ultimate goal of automatically finding attacks that probabilistic polynomial-time adversaries can carry out on protocols. The second direction aims at developing frameworks and techniques for evaluating and reducing information leakage caused by adaptive attackers.

Cybersecurity France-Japan: Website

- Collaborative Website that can be updated by all members to keep it alive:

-WG6 Workshop in France

The screenshot shows the website header with the title "Cybersecurity France-Japan" and the subtitle "Scientific collaborations between France and Japan". A search bar is located in the top right corner. The navigation menu includes "Home", "Steering Committee", "Conferences", and "News". The main content area displays a breadcrumb trail: "Home > Uncategorized > WG6 workshop January 26th and 27th 2017 in Gardanne and Cadarache (13, France)". The article title is "WG6 workshop January 26th and 27th 2017 in Gardanne and Cadarache (13, France)", with a sub-header "Uncategorized". The text describes a two-day workshop organized within the Working Group 6 framework. Day 1 focused on hardware security, and Day 2 in Cadarache dealt with cyber security. A list of presentations follows, including NICT_YNU_2017, Allistene_2017, LHS-PEC_STM_OrangeLabs_2017, and CEA_UVSQ_EMSE_2017.

WG6 workshop January 26th and 27th 2017 in Gardanne and Cadarache (13, France).

■ Uncategorized

Within **Working Group 6** framework, a two days workshop has been organized on January 26th and 27th 2017 in Gardanne a

Day 1 was dedicated to hardware security including :

- Presentation of system and architecture security labs
- Visit of the clean room and security labs
- Presentations coming from academics labs (Inria, CEA and EMSE).

Day 2 in Cadarache deal with cyber security :

- Cartography of French public research in cybersecurity
- Visit of CEA SCADA platform
- Presentations coming from industrial partners (Atos, Seclab)

Presentations:

Sustain the WG collaborations

Funding bilateral projects

- ✓ CNRS PICS International Programs for Scientific Cooperation
JRP Joint Research Projects (PRC)
- ✓ Inria - JSPS AYAME Associate Teams
- ✓ French Embassy PHC SAKURA
- ✓ JSPS Open Partnership Joint Research Projects/Seminars

Funding students/researchers exchanges

- ✓ PhD
- ✓ Post-docs
- ✓ Senior Researchers
- ✓ Student Fellowships

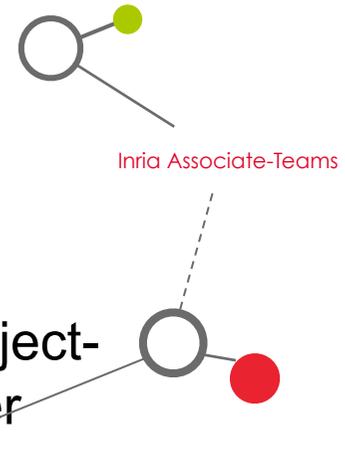

From Japan to France : JSPS and French Embassy

From France to Japan : JSPS

Inria opportunities

Inria Associate Teams Program : **AYAME call for proposals**

- **Jointly funded by Inria and JSPS** for a 3 years term
- **Annual call for joint research projects** between an Inria project-team and a japanese university/ research institution partner
- **Around 60.000 euros** funding per project

2017

1 on-going joint
research project:
LOGIS
(Keio and Inria)
WG1

2017 Timeline

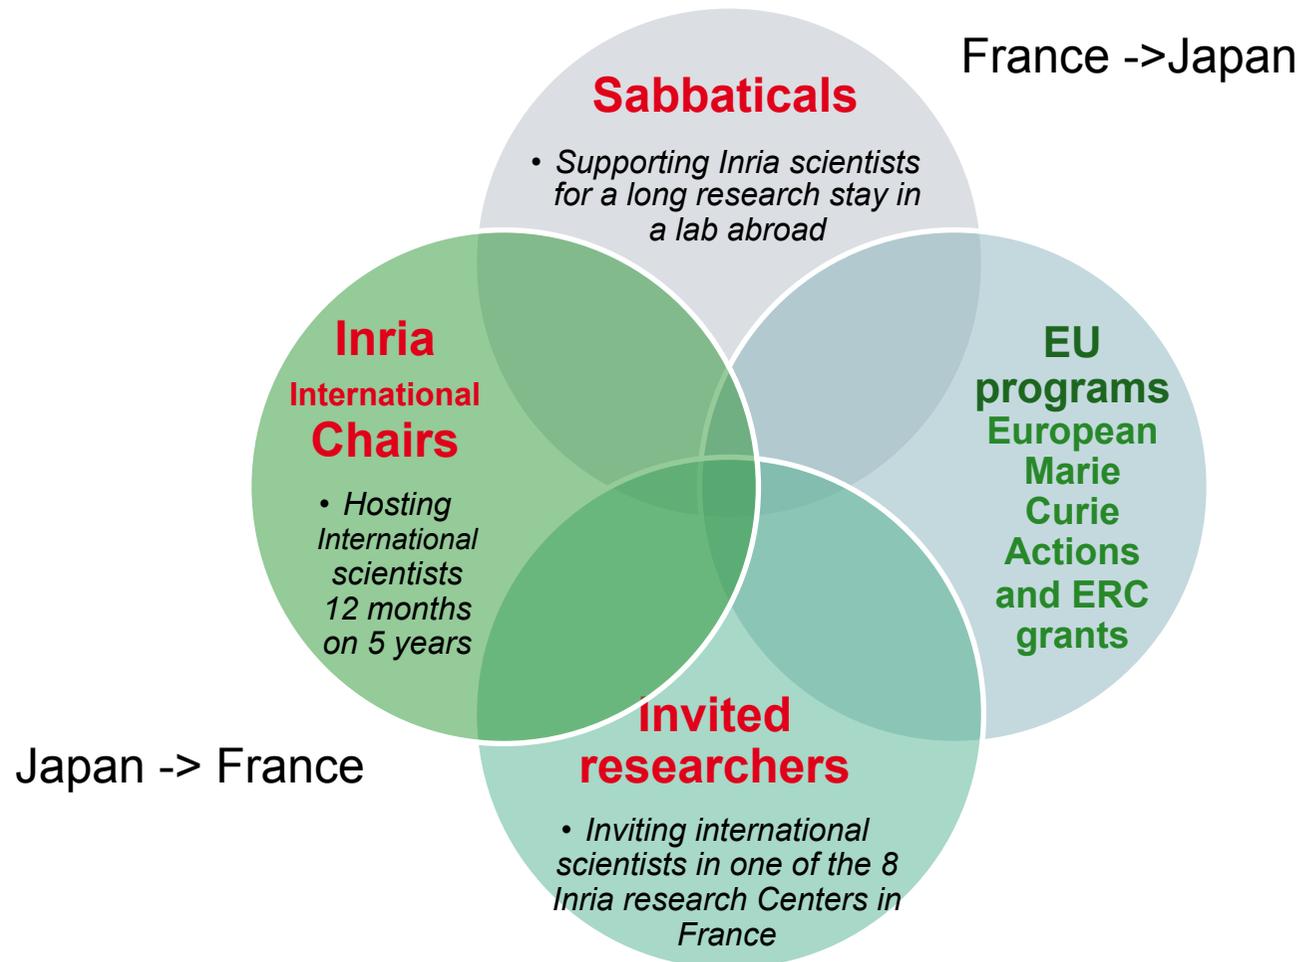

Japan: Call will be launched by JSPS by June 2017.
Deadline for submissions: **September 6th, 2017**

France: Call will be launched by Inria on June 28th.
Deadline for submissions: **September 27th, 2017**

Proposals have to be submitted to Inria and universities.

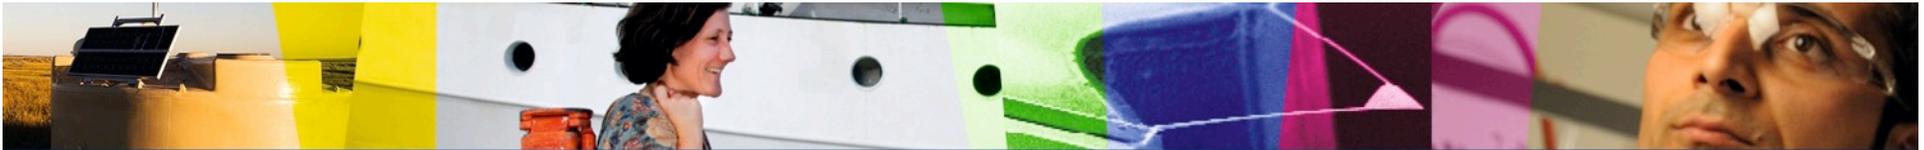

Mobility programs

Researchers Exchanges

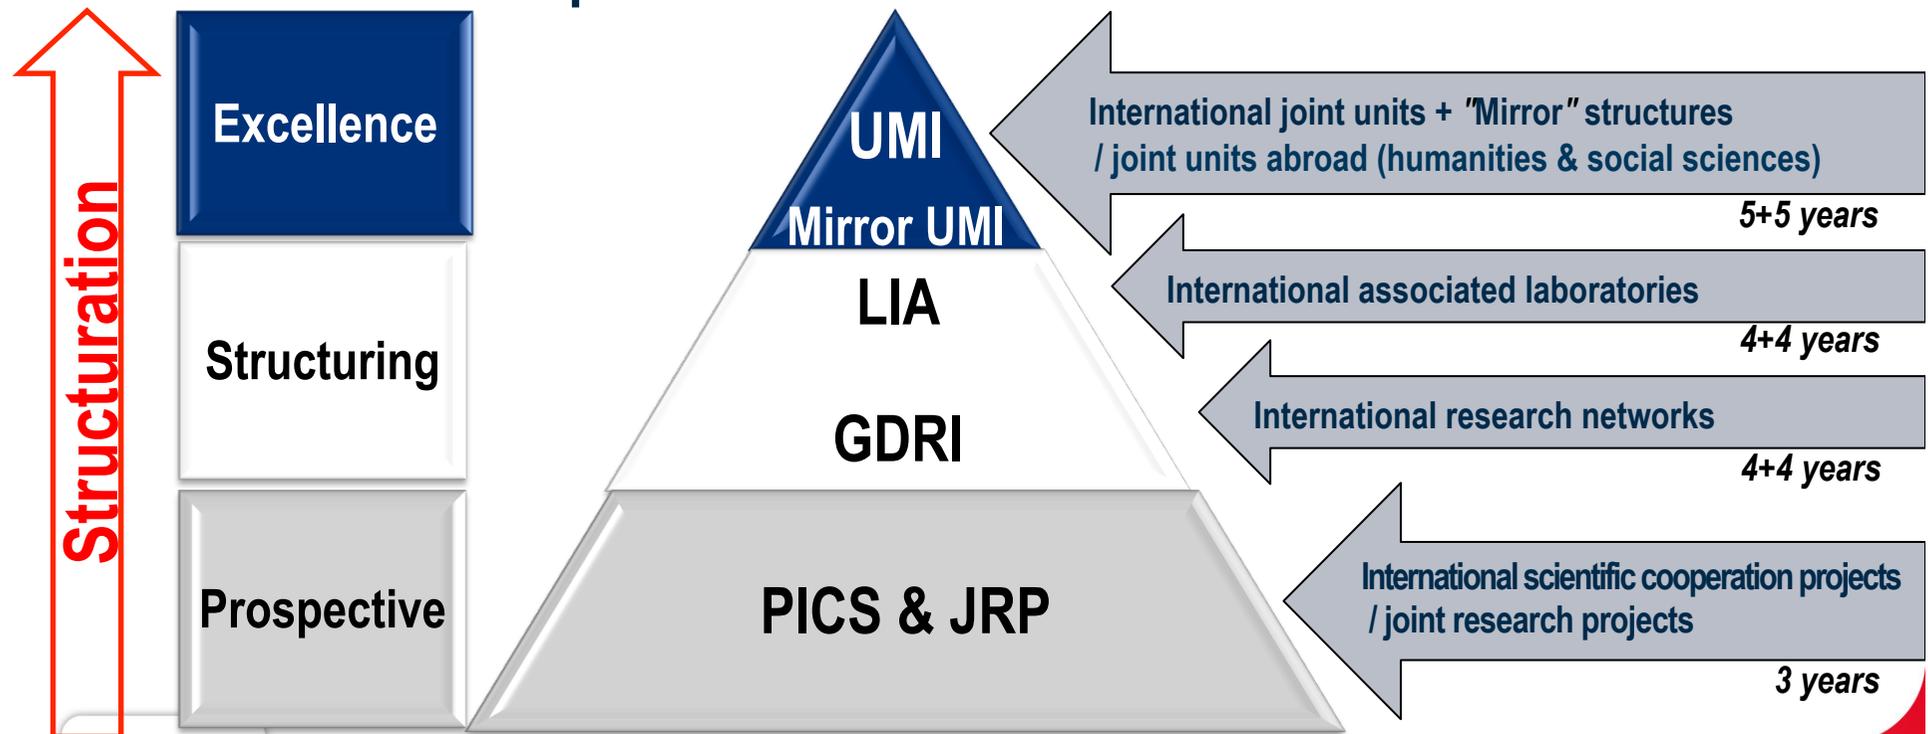

CNRS opportunities

CNRS INTERNATIONAL COOPERATION

The CNRS plays a key role in global structuration & has developed a range of cooperative tools functioning on a competitive basis

CNRS International cooperation tools

They are structured at multiple levels:

- **Joint Research Projects (PRC)** make it possible to set up co-financed collaboration between teams from the CNRS and specific international partners.
- **International Programs for Scientific Cooperation (PICS)** deal with financing initiatives between teams that have already established links through joint publications or student training programs.
- **International Associated Laboratories (LIA)** lay the bases of cooperation around a joint project, mostly between one or several French teams and a main partner abroad. They sometimes foreshadow the creation of an International Joint Unit.
- **International Research Networks (GDRI)** allow teams from two or more countries to collaborate on a joint scientific project.
- **International Joint Units (UMI)**, which are proper joint laboratories, have the same status as CNRS joint research units (UMR) in France. These UMIs are most often backed by one or several French laboratories, making up a “mirror UMI”.

ANR opportunities

Generic call for proposals

Generic call for proposals : open to all scientific disciplines and types of research, from basic research through to applied research carried out in partnership with private companies, including SMEs.

International Collaborative Research Projects “PRCI” : ANR agreement with JST and MEXT

Selection procedure in two stages (5-page **pre-proposal**, then full proposal)

Key dates (for 2017):

- submission of pre-proposals: **October 2016**,
- Closing date for pre-registration of "International collaborative research projects" (PRCI): **October 2016**
- Closing date for submission of full proposals (for the coordinators invited to submit a full proposal and for the coordinators of the "International collaborative research projects" (PRCI)): **April 2017**

Setting up European or International Scientific Networks (MRSEI)

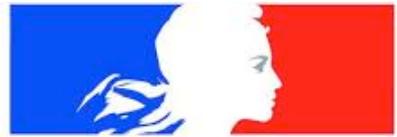

To prepare the **coordination of a proposal submitted to a large-scale European or international call for proposals**. The projects must propose the **construction of a network of a high scientific level** on subjects of strategic importance and proposing actions having a major scientific, technological or societal impact.

Release date of the call (2016): Tuesday 19 April 2016

Deadline for submission of proposals: Monday 6 June 2016

Two calls announced in 2017

Expected funding per project: **€30-50k in funding over an 18-month period**.

日本学術振興会
Japan Society for the Promotion of Science

JSPS opportunities

Open Partnership Joint Research Projects/Seminars

- **What's this scheme for?** to conduct bilateral joint research projects or seminars with funded Japanese colleagues.
- **How does the scheme work?** Fund Japanese colleagues to participate to a joint research project or seminar
- **What expenses does the scheme support?** Supports the costs of the Japanese teams, mainly their travel and accommodations.
 - ✓ Joint Project (1-2 years) : Up to JPY 2,500,000 /a year/ a project
 - ✓ Joint Seminar (up to 1 week): Up to JPY 2,500,000 /a year/ a seminar

Contact: nikokukan@jsps.go.jp

Core-to-Core Program: Advanced Research Networks

To create **world-class research hubs** in research fields considered to be cutting-edge and establish sustainable collaborative relations among research/education institutions in Japan and around the world.

- **Eligibility of Japanese applicants**

(1) Japanese universities and research institutions or departments are eligible as a Japanese core institution.

(2) A full-time researcher employed at the Japanese core institution who is appointed as a co-chair of the project.

- **Project Period: 5 years**

- **At least 2 countries outside Japan with matching funding**

Program for Advancing Strategic International Networks to Accelerate the Circulation of Talented Researchers (Japan -> France)

To foster excellent young Japanese researchers engaged in world-level international joint research.

- **Eligible Young Researchers**

(1) Researchers and doctoral students affiliated with an eligible Japanese university or research institute (up to 45 years of age in principle)

(2) Tenure of visits overseas: more than 1 year in principle

- **Project Period: 1 to 3 years**

International Programs for Individual Researchers (France -> Japan)

The “JSPS International fellowships for research in Japan” consists of two programs:

- **Postdoctoral Fellowships for Research in Japan** for young researchers
- **Invitation Fellowship for Research in Japan** for mid-career and senior researchers.

Deadlines: April 2017

European Union opportunities

General principles for H2020 participation of third countries

- General rule of at least 3 participants from 3 different EU Member States or Associated countries
- International cooperation is a cross-cutting priority in H2020, participation from non-european countries welcome
 - Participation in any regular call of the H2020 programme
 - Targeted openings
 - Horizontal actions on international cooperation
 - Coordinated calls
- Eligibility for H2020 funding: only in exceptional circumstances, industrialised and emerging economies can receive EU funding => no automatic EC funding
 - existence of a bilateral agreement/arrangement
 - identification of the country in the relevant work programme or call for proposal as being eligible for funding
 - Participation deemed to be essential for carrying out the action

Relevant calls 2017 on cybersecurity

➤ DS-06-2017: Cybersecurity PPP: Cryptography

Planned Opening: 8 Decembre 2016

Deadline: 25 April 2017

Research and Innovation Actions, TRL 3-5, Budget available: 20,5 M€ (projects 3-5 M€)

➤ DS-07-2017: Cybersecurity PPP: Addressing Advanced Cyber Security Threats and Threat Actors

Planned Opening: 1 March 2017

Deadline: 24 August 2017

Research& Innovation Actions (TRL 3-5, budget available: 10 M€, projects 2-3 m€),
Innovation Actions (TRL 6-7, budget available: 8 M€, projects 4-5 m€)

➤ DS-08-2017: Cybersecurity PPP: Privacy, Data Protection, Digital Identities

Planned Opening: 1 March 2017

Deadline: 24 August 2017

Innovation Actions (TRL 6-7, budget available: 17,6 M€, projects 2-3 M€)

Mobility through european programmes

Erasmus Mundus TEAM scholarship – cf Pr. Kadobayashi's talk

Marie-Skłodowska-Curie-Actions – Programme for transnational, intersectoral and interdisciplinary mobility with different types of actions, among which

✓ **Individual fellowships (IF): support for experienced researchers undertaking mobility between countries** (optionally to the non-academic sector)

Next call MSCA-IF-2017 (Opening date: 11 April 2017, Deadline: 14 Septembre 2017)

✓ **International and inter-sectoral cooperation through the Research and Innovation Staff Exchanges (RISE)**

Next call MSCA-RISE-2017 (Opening date: 1 Decembre 2016, Deadline: 5 April 2017)

Opening ERC teams to the world - with the aim to encourage young top scientists from non-european countries to join research teams of ERC grantees
A specific agreement has been signed in 2015 between ERC and JSPS

Promote the global collaboration

Networks

- ✓ CNRS GDRI
- ✓ EU FP7 projects
- ✓ ANR MRSEI
- ✓ **Contribution to EUNITY**

Structured Lab

- ✓ UMI JFLI
- ✓ JSPS Core-to-Core program
