

# VEP-S is a trustworthy platform

Distributed applications can now be deployed seamlessly over different cloud providers under SLA agreements thanks to the use of standardized interfaces.

*Quick deployment of distributed applications*

Resource negotiation via Service Level Agreement (SLA)

Standards

Interoperability

Monitoring

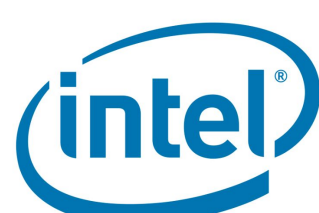

Advance reservation

Application lifecycle management

Multi-datacenter support

## Trust in Clouds

The VEP-S project is partially funded by the EIT ICT Labs activity #14436
